25 YEAR RE-REVIEW

Chief, Language Services Division

14 May 1953

Director of Training

Portable Audio-Visual Device

1. Your memorandum of 1 May 1953 concerning the audio-visual portable unit developed by TSS has been received.
2. We need to have replicas of this portable unit made for use in several programs of the Agency. We would not, of course, put the machine on the market.
3. So far as we have been able to determine, this unit does not incorporate any patentable features disclosed by you to representatives of the Agency. If you have any information to the contrary, we would be glad to receive it.
4. In any event, we wish to avoid any misunderstanding or disagreement on this point. If it is agreeable with you, we will draft a proper form of release for signature by you, consenting to the reproduction and use of these units by the Agency.
5. Please let me hear from you at your earliest convenience. Your cooperation in this matter is appreciated.
